

HUMANITARIAN ANALYSIS BOOTCAMP

WHY THIS TRAINING COURSE?

Humanitarians worldwide make life-saving decisions daily. But in a complex, fast-moving situation, it is harder to get a clear picture. Getting the right data, making sense of it, and providing evidence play a crucial role in ensuring assistance reaches those most in need. This is why we created the Humanitarian Analysis Bootcamp (HAB), an interactive 10-week online course where humanitarians will develop the knowledge, skills and attitudes needed to provide quality analysis.

WHAT TO EXPECT?

The Bootcamp is a fully online course and mixes short self-paced modules, individual and group work, peer-peer learning and live facilitated sessions by a qualified trainer. The approach is based on real-life humanitarian examples. The course will use gamified teaching methods, videos, podcasts, and interactive facilitation techniques.

IS THIS COURSE FOR ME?

Are you an early career or aspiring analyst looking to develop and apply your skills to the humanitarian sector? Or do you already have some experience in the humanitarian sector, but less in analysis specifically? Or perhaps you have just never received formal training in analysis and would like to change that? If so, this could be the course for you!

PROGRAMME 2024

WEEK 1

The Foundation
Blocks of Analysis

WEEK 2

Analytical Thinking

WEEK 3

Sources

WEEK 4

Biases

WEEK 5

Planning your
Analysis

WEEK 6

Doing your Analysis

WEEK 7

Simulation week

WEEK 8

Visualisations

WEEK 9

Analytical
writing

WEEK 10

Course Wrap-Up

WHAT WILL I LEARN?

You will get a chance to:

- Understand the crucial role of humanitarian analysis in decision-making and how to increase its impact.
- Learn about the main aspects of analysis, including how to plan for analysis, using practical tools, and communicating results.
- Gain the knowledge, skills and attitudes needed to become a humanitarian analyst, including recognising biases and strategies to avoid them.
- Put into practice your new knowledge through weekly exercises, case studies and games.
- Experience and practice your skills as an analyst through a desk-top based simulation.
- Benefit from support from your lead facilitator.
- Join a global community of practice through an Alumni network.
