Data Analyst (multiple roles, Yemen, regional)

Job Description and Requirements

The Norwegian Refugee Council (NRC) is an independent humanitarian organisation helping people forced to flee.

We protect displaced people and support them as they build a new future. We started our relief efforts after World War Two. Today, we work in both new and protracted crises across more than 30 countries. We specialise in six areas: food security, education, shelter, legal assistance, camp management, and water, sanitation and hygiene.

We stand up for people forced to flee. NRC is a determined advocate for displaced people. We promote and defend displaced people's rights and dignity in local communities, with national governments and in the international arena. NRC's Internal Displacement Monitoring Centre in Geneva is a global leader in monitoring, reporting on and advocating for people displaced within their own country.

We respond quickly to emergencies. Our expert deployment capacity, NORCAP, boasts around 1,000 experts from all over the world who can be deployed within 72 hours. Our experts help improve international and local ability to prevent, prepare for, respond to and recover from crises.

Around 6,000 men and women work for the Norwegian Refugee Council. Most of us are hired locally to work in the field, and a small number are based at our head office in Oslo. Many of our colleagues were once themselves fleeing their homes.

ACAPS Purpose

ACAPS is dedicated to improving analysis of humanitarian needs in complex emergencies and crises. We are independent of specific operational and sectoral agendas or interests, and therefore guarantee objective and evidence-based analysis. Our team supports the humanitarian community by providing up-to-date information on key crises around the globe. By bringing together different sources of secondary (and where appropriate primary) data and using robust methodologies, we move beyond descriptive analysis to explanatory and interpretive analysis: in other words, we enable data to tell us: so what? This enables crisis responders to better understand and thereby better address the needs of the affected population, and at the same time strengthening the assessment ecosystem

Positions

ACAPS is looking for Data Analysts to fill multiple country-specific and regional roles. Analysts will be responsible for designing surveys, analysing results, producing high quality analysis tables, charts and dashboards and supporting engagement with network members, other ACAPS analysts and consultants to make the best possible use of incoming data. ACAPS is looking for a dynamic, flexible team player to help grow this innovative project. We are particularly looking for candidates who have experience with both primary and secondary data analysis methodologies as well as creating high quality analytical products.
Competencies

- Relevant university degree or higher education, preferably in IT, data science, statistics, information management, social sciences or economics
- At least 2 years of experience of humanitarian information management. Extensive experience in undertaking and managing complex data management. Experience leading multi-sectorial, multi-agency assessments is a plus
- Knowledge of data tagging and data based management; and sound skills on MS excel, SQL, Python or any other database management software
- Knowledge of quantitative data analysis methods (Ability to use porotype data analysis software such as R, SPSS, STATA, or Python)
- Strong data visualization skills including Geographic Information System (Sound knowledge on Power BI, Tableau, Arc GIS or other Geospatial tools)
- Sound knowledge on data collection tools and methodology for example KOBO, SMAP, etc
- Fluent written and oral communication skills in English; Working knowledge of French, Arabic or Spanish – desired
- Ability to make rapid decisions, sometimes with incomplete or imperfect information during a fast-changing situation.

This position is only open to Jordanian applicants. We welcome applications from qualified and interested candidates. Candidates are encouraged to apply early, as applications may be screened prior to the vacancy deadline.

Salary/benefits: According to NRC’s salary scale and terms and conditions

Duty station: Amman, Jordan with occasional travel to Yemen, as needed

How to apply

Interested candidates should apply through the Akhtaboot platform. The closing date for this position is 25 August 2020.
