

# HOW DOES ACAPS PRODUCE ANALYSIS?

## MONITORING

We monitor more than 160 websites daily, covering about 100 countries

## FILTERING

We select and store relevant information, gathering data for a set of robust indicators

## ANALYSING

We identify priority needs and trends, and forecast developments

## SHARING

We publish timely, relevant, analysis, freely available. Feedback is welcome!

# WHAT CAN ACAPS DEVELOP FOR YOU?

Based on our strong methodology, we can develop:

## CRISIS ANALYSIS REPORTS

---

### **Briefing notes** - Timely and focused

A humanitarian snapshot based on secondary data that provides essential information on context and immediate needs within 12-24 hours of a disaster

### **Thematic reports** - In-depth

A longer focused report analysing a specific topic, place or population group

### **Country profiles** - Baseline picture

A summary of key conditions that may impact the humanitarian situation. Geographic, political, social, and economic data outline potential drivers, while sector-specific information gives pre-crisis data

## FORECASTING REPORTS

---

### **Anticipatory reports** - Imminent planning

A warning of a potentially imminent change in a circumstance that is expected to have humanitarian consequences and may therefore require additional response capacity and preparedness measures

### **Risk analyses** - Long term preparedness

A forward looking analysis of current events and past trends within 3-6 months period in order to assess the likelihood of a risk occurring and its potential humanitarian impact
